SUMMARY

Result-oriented Senior Software Engineer with 3 years of production experience architecting high-scale SaaS platforms. Specialized in engineering data-intensive pipelines that process millions of records using Node.js and AWS. Expert in building robust e-commerce ecosystems by managing complex API integrations (Shopify, Meta, Shipping). Proven track record of designing automated workflows and AI/LLM-driven (RAG) solutions that minimize operational overhead and scale business performance. Dedicated to architecting resilient, production-grade systems that process high-volume data with low latency and measurable business ROI.

TECHNICAL SKILLS

- **Engineering & Architecture:** System Design, Microservices Architecture, SDLC Methodologies, Agile/Scrum.
- **Languages:** Java (Core/DSA), JavaScript (ES6+), TypeScript, Python.
- **Web & Mobile Development:** Node.js, NestJS, Express.js, RESTful APIs, React.js, Next.js, React Native.
- **Database & Storage:** PostgreSQL, MongoDB, Redis, Pinecone (Vector DB), DynamoDB.
- **Cloud & DevOps:** AWS (ECS, EC2, S3, SQS, Lambda, Cognito, CloudWatch), Docker, Git, CI/CD, Nginx.
- **E-commerce & AI:** Shopify App Development, Meta Conversions API (CAPI), RAG Architecture, Generative AI.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Ascent Media Agency, Nagpur | *June 2024 – Present*

- Architected and scaled a multi-tenant SaaS platform, managing complex data synchronization and API orchestration across Shopify, Meta, and shipping APIs for enterprise merchants.
- Managed the end-to-end SDLC for feature development—from requirement gathering and technical design to deployment and post-launch maintenance.
- Optimized backend performance by implementing Redis-based caching and efficient database indexing, improving system throughput and reducing response times by 35%.
- Engineered AI-powered marketing tools using AWS Bedrock and predictive analytics to automate campaign optimization and increase ROAS.
- Implemented containerized deployments via AWS ECS and maintaining system observability using AWS CloudWatch to ensure 99.9% uptime.

PROJECTS

1. Profit First — AI Business Intelligence SaaS | Live | App

- **System Architecture**: Architected an event-driven SaaS on AWS (ECS, SQS, DynamoDB) to ingest and process millions of records from Shopify and Meta APIs with sub-2-second query latency.
- **Database Engineering**: Designed a single-table DynamoDB schema with GSI patterns for fast aggregation of profit, COGS, GST, and RTO analytics.
- **RAG & AI Pipeline**: Developed an AI consultant using RAG architecture (Pinecone and AWS Bedrock), grounding LLM responses in merchant financial data to generate growth strategies.
- **Data Integrity**: Implemented webhook verification, idempotency patterns, and background workers to maintain data consistency during high-traffic sales events.

2. Ads Manager Platform | Live

- Built high-performance dashboards using distributed background workers, enabling business owners to launch ads with one click and easily monitor real-time advertising performance.
- Implemented Meta Conversions API (CAPI) to improve conversion-event tracking by capturing server-side events independently of browser-based tracking restrictions.

3. See Before Buy — Virtual Try-On Visualization Tool | Live

- Engineered an AI-powered product visualization tool enabling users to preview products virtually.
- Implemented a scalable image-processing pipeline on AWS (S3, EC2, SQS), reducing returns and increasing merchant conversion rates by 8%.

4. AI-Powered WhatsApp Automation | Live

- Architected automated messaging pipelines integrating Shopify APIs and webhooks.
- Built an automated customer recovery system that resolved 80% of support queries, reduced manual support overhead, and helped businesses recover lost revenue through automated customer retargeting.

EDUCATION

B.Tech in Computer Science & Engineering | J D College of Engineering, Nagpur | **CGPA: 7.63**

CODING PROFILES

HackerRank (5-Star Java) | LeetCode & GFG (150+ Problems solved, active Problem of the Day participant).
